

# LABELING AND RATING SYSTEMS

## An Interpretation of the LIBRARY BILL OF RIGHTS

Libraries do not advocate the ideas found in their collections or in resources accessible through the library. The presence of books and other resources in a library does not indicate endorsement of their contents by the library. Likewise, providing access to digital information does not indicate endorsement or approval of that information by the library. Labeling and rating systems present distinct challenges to these intellectual freedom principles.

Many organizations use or devise rating systems as a means of advising either their members or the general public regarding the organization's opinions of the contents and suitability or appropriate age for use of certain books, films, recordings, websites, games, or other materials. The adoption, enforcement, or endorsement of any of these rating systems by a library violates the American Library Association's *Library Bill of Rights* and may be unconstitutional. If enforcement of labeling or rating systems is mandated by law, the library should seek legal advice regarding the law's applicability to library operations.

Viewpoint-neutral directional labels are a convenience designed to save time. These are different in intent from attempts to prejudice or discourage users or restrict their access to resources. Labeling as an attempt to prejudice attitudes is a censor's tool. The American Library Association opposes labeling as a means of predisposing people's attitudes toward library resources.

Prejudicial labels are designed to restrict access, based on a value judgment that the content, language, or themes of the resource, or the background or views of the creator(s) of the resource, render it inappropriate or offensive for all or certain groups of users. The prejudicial label is used to warn, discourage, or prohibit users or certain groups of users from accessing the resource. Such labels sometimes are used to place materials in restricted locations where access depends on staff intervention.

Viewpoint-neutral directional aids facilitate access by making it easier for users to locate resources. Users may choose to consult or ignore the directional aids at their own discretion.

Directional aids can have the effect of prejudicial labels when their implementation becomes proscriptive rather than descriptive. When directional aids are used to forbid access or to suggest moral or doctrinal endorsement, the effect is the same as prejudicial labeling.

Libraries sometimes acquire resources that include ratings as part of their packaging. Librarians should not endorse the inclusion of such rating systems; however, removing or destroying the ratings—if placed there by, or with permission of, the copyright holder—could constitute expurgation (see "Expurgation of Library Materials: An Interpretation of the *Library Bill of Rights*"). In addition, the inclusion of ratings on bibliographic records in library catalogs is a violation of the *Library Bill of Rights*.

Prejudicial labeling and ratings presuppose the existence of individuals or groups with wisdom to determine by authority what is appropriate or inappropriate for others. They presuppose that individuals must be directed in making up their minds about the ideas they examine. The fact that libraries do not advocate or use proscriptive labels and rating systems does not preclude them from answering questions about them. The American Library Association affirms the rights of individuals to form their own opinions about resources they choose to read or view.

Adopted July 13, 1951, by the ALA Council; amended June 25, 1971; July 1, 1981; June 26, 1990; January 19, 2005; July 15, 2009; July 1, 2014.
